Step Up to Quality is a rating program intended to ensure and improve the quality of early care and education young children receive in the state of Ohio. What program is right for my family?

There are four types of licensed early care and education programs in Ohio. To determine the type of provider for which you are looking, please refer to the following key:

A = Family Child Care Type A Homes - 7 to 12 children (or 4 to 12 children if 4 children are under 2 years of age) cared for in the provider's home. The provider's own children under 6 years of age must be included in the total count.

B = Family Child Care Type B homes serving children through the publicly funded child care program - 1 to 6 children cared for in the provider's personal home. No more than three children may be under the age of two. The provider's own children under six years of age must be included in the total count.

C = Child Care Centers – 13 or more children at one time, 7 to 12 children if not in a personal residence.

P = Public Preschool - either of the following: (1) A program for preschool children that is operated by a school district board of education, educational service center, joint vocational school, an eligible nonpublic school; or (2) A program for preschool children age three or older that is operated by a county board of DD.
